Election/Restrictions

Applicants' election of the invention of group III with traverse is acknowledged. The comments have been noted and considered however the restriction is deemed sound for reasons of record and hereby maintained. the Restriction will be reconsidered upon determination of allowable subject in accordance with current Rejoinder practice. Accordingly, claims 9, 11 and 17-22 will be searched to the extent they read on the elected invention. Claims 9 and 16 have been withdrawn from consideration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 11 and 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al WO 00/07980.

Brown et al teach amide compounds of the type claimed where in formula (I) of Brown R⁴ is cycloalkyl (read cyclopropyl), Q is phenyl substituted with heteroaryl-alkoxy. See, e.g., page 23 line 30, where the heteroaryl is pyridyl, page 13 lines 14-19, page 5 lines 23-24, showing substituents corresponding to

applicants' R_1 and R_2 , page 5 line 14-15 and page 30 lines 10-11. In view of the art as a whole, amides of formula (I) with pyridyl as the heteroaryl substituent of the alkoxy would have been obvious to one of ordinary skill in the art.

No claim is allowed.
